

SA U.S. VALUE FUND

Select

As of 3/31/2019

The Fund's goal is to achieve long-term capital appreciation. The Fund pursues its goal by generally investing in a target universe consisting of common stocks of large and mid cap U.S. companies traded on a principal U.S. exchange or on the over the-counter market in the United States that are believed to be value stocks at the time of investment. Dimensional Fund Advisors LP (the "Sub-Advisor") considers value stocks primarily to be those companies with high book values (values that are derived from a company's balance sheet) in relation to their market values (values that are derived by multiplying the market price per share of a company's stock by the number of outstanding shares of that stock). In measuring value, the Sub-Advisor may also consider such factors as price-to-cash flow or price-to-earnings ratios. The criteria used for assessing value are subject to change from time to time.

Investing involves risk, principal loss is possible. The risks associated with investing in stocks and overweighting small company and value stocks potentially include increased volatility (up and down movement in the value of your assets) and loss of principal.

The Russell 1000 Value Index (Russell 1000 Value TR USD) measures the performance of the large-cap value segment of the U.S. equity universe. It includes those Russell 1000 companies with lower price-to-book ratios and lower expected growth values. This index is unmanaged and reflects reinvested dividends and/or distributions, but does not reflect sales charges, commissions, expenses or taxes. An individual cannot invest in an index.
